KansaSTAR Reporting Requirements and Timelines

Revised 3.18.13

The School Leadership Team with the implementation coach or district facilitator should continually update the KansaStar as part of the school's comprehensive, continuous school improvement process. Coaching comments should be provided throughout the year by implementation coach or district facilitator. The primary goals of the Leadership Team should be to create quality, workable implementation plans, and to facilitate collaboration to ensure meaningful input from the school Leadership Team and staff.

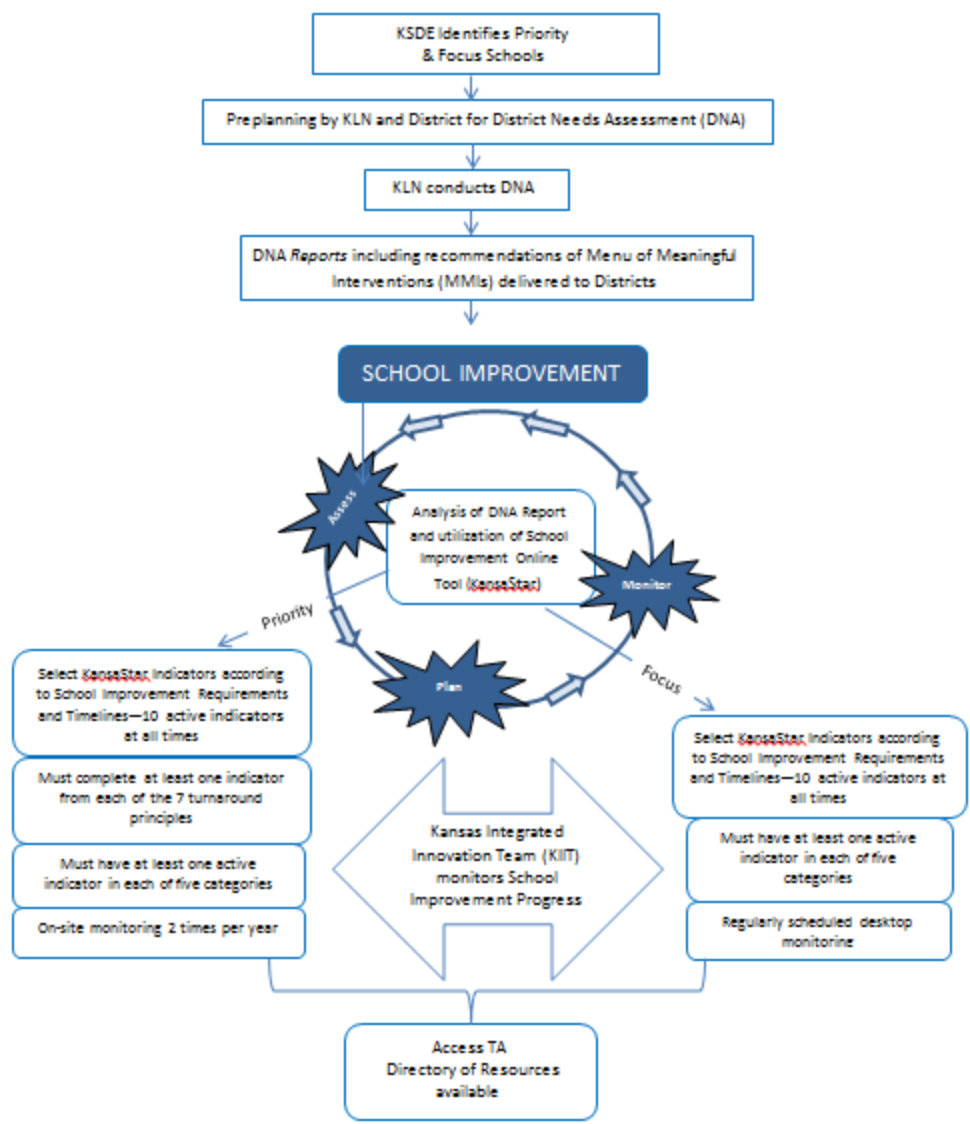

Active Indicators are indicators that are assessed, planned for with assigned tasks, and the implementation process begun. Schools must have 10 indicators active at all times by June 20, 2013. When one indicator has evidence of full implementation, the team selects another indicator, so the school or district has 10 indicators active, or being worked on at all times.
